Profile

Recent Master of IT graduate from The University of Western Australia with strong skills in full-stack development, data handling, and system design. Experienced in building real-time web applications and working with modern technologies such as React, Django, and cloud services. A fast learner with strong problem-solving abilities, seeking an entry-level IT role to contribute to practical and scalable solutions.

Skills

Languages: Python, JavaScript, C

Frameworks: React, Django, REST APIs

Tools: Git, Docker, SQLite, AWS

Others: IOT(ESP32), sensor integration

Projects

Digital Medical Record System (Full-stack Web Application) UWA-CITS5206-DMR

- Developed a real-time medical record system using React and Django, supporting multi-user data updates and persistent patient records.
- Designed and implemented RESTful APIs for managing patient data, observations, and lab requests with structured database integration.
- Built data visualisation features to display patient trends and improve usability for medical training scenarios.
- Collaborated in a team using Git and Agile workflows, contributing to both front-end UI and back-end logic.

Website Design Project (Client-based) dynasties-site-E-C

- Designed and developed a responsive website for a Chinese company, translating business requirements into functional UI solutions.
- Implemented front-end features using HTML, CSS, and JavaScript to ensure usability and cross-device compatibility.
- Communicated with the client to refine requirements and iteratively improve design and functionality.
- Delivered the project within timeline in a small team, enhancing collaboration and project management skills.

IoT Child Car Seat Alert System IOT Smart Child Alert System

- Built an IoT-based safety system using ESP32 to detect child presence in a car seat.
- Integrated sensors and real-time monitoring logic to track seat status and vehicle conditions.
- Implemented mobile notifications using Blynk to alert users when potential risks are detected.
- Designed fail-safe logic to trigger alarms if alerts are not acknowledged within a set time.

Experience

Sushi Gin, Front-of-House / All-rounder (Part-time) Perth, Australia
Jul 2025 – Present

- Delivered customer service at the CBD store, handling orders, payments, and customer interactions in a fast-paced environment.
- Prepared sushi and maintained food presentation standards, ensuring quality and consistency.
- Independently managed operations at the Karrinyup store, including opening pro-

cedures, food preparation, sales, and closing tasks.

- Handled stock management, including restocking, inventory checks, and preparation of ingredients for daily operations.
- Demonstrated strong multitasking and time management skills by covering multiple roles under minimal supervision.

Dahua CPA Firm, Auditor — Beijing, China — Jan 2021 – Apr 2022

- Adapted quickly to fast-paced audit cycles during annual reporting periods, delivering work efficiently under tight deadlines.
- Participated in on-site audits for 10+ companies, travelling with the audit team to complete fieldwork and data verification.
- Liaised with client finance staff (cashiers) to collect and validate financial data, ensuring accuracy and completeness.
- Communicated with banks to confirm account balances and support audit procedures.
